ARE YOU COMMITTED ENOUGH TO WEAR CCM?

UFORM - 3D

Made with Highly reactive U FOAM the quarters, tongue and footbed of the skate all mold to 3-dimensional surfaces of your foot : The end result is a skate that is customized for you.

FLUIDFIT SYSTEM

The inner components of the boot were engineered using CCM's FluidFit System, creating an environment of instant step-in comfort for the foot prior to thermo-forming. Sculpted quarters, deep heel pocket and forefoot relaxation zones work together to provide a new level of stability and comfort right out of the box.

ACTIVE RESPONSE DESIGN

Pro grade components are integrated using Active Response Design, reducing the overlap of materials and overall skate weight. By fitting the boot as close to the foot as possible, it allows the skate to react with you, transferring maximum stride energy from the foot directly to the blade.

HEAT SYSTEM

CCM U+ thermal sticker Heat customization made easy.

Make sure that CCM U+ thermal sticker is applied in the proper position.

Do not allow the skate to reach the "too hot" zone. If it does, remove from skate oven immediately and wait until sticker returns to "OK" zone before lacing.

CCM U+ 10

Quater : Rugged Armour
 Liner : Duratex
 Tongue : Felt / Lace Bite Protection
